

As a group, create a WODB for 3 families of functions:

- Linear
- Exponential
- Quadratic
- Square Root
- Rational

You must have graphs **and** equations for each box. You may use inequalities. Your graphs must be reasonably accurate.

<p>Top-left</p> 	<p>Top-right</p> 
<p>Bottom-left</p> 	<p>Bottom-right</p> 

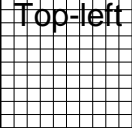

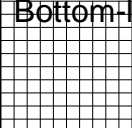

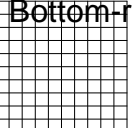

<p>How is the top-left different from the others?</p>
<p>How is the top-right different from the others?</p>
<p>How is the bottom-left different from the others?</p>
<p>How is the bottom-right different from the others?</p>
